

System Integration of Security Infrastructure Components:

Firewall  
Switch  
Intrusion Detection  
Integrity Checks  
Availability Monitor  
Application Gateway  
Authentication  
Spam Filter  
Asset Management  
Anti-Virus  
Physical Sensors  
Imaging

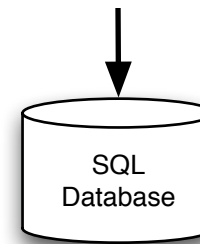

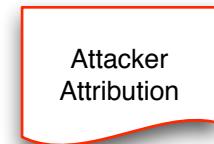

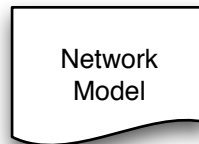

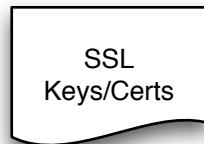

# OpenSIMS Architecture

Based on J2EE Servlet Container, SQL Database, Web Services, Flash Player, and typical security infrastructure components, and providing a framework for collaborative risk metrics.
